

Supporting Students with Medical Conditions

Policy Statement

The Children and Families Act 2014 Section 100 places a duty on schools to make arrangements for children with medical conditions. **“Students with medical conditions have the same right of admission to school as other children and cannot be refused admission or be excluded from school on medical grounds alone.”** However, teachers and other school staff in charge of students, have a duty to ensure the safety of all the students in their care, to this end, we reserve the right to refuse admittance to a child with an infectious disease, where there may be a risk posed to others or to the health of the child involved. This duty also extends to teachers leading activities taking place off the Academy site.

Scope

This document describes the Academy’s approach to supporting students with medical conditions. This policy is intended as guidance for all staff, including non-teaching staff and governors.

This policy should be read in conjunction with our positive mental health policy in cases where a student’s medical needs overlaps with, or is linked, to a mental health issue and the Learning Support policy where a student has an identified Special Educational Need and / or disability.

This policy aims to:

- To make reasonable adjustments, where necessary, to include students with medical conditions in all aspects of Academy life.
- To ensure that all staff members take appropriate steps towards supporting students with medical conditions.
- To ensure that Academy staff involved in the care of children with medical needs are fully informed and adequately trained by a professional in order to administer support or prescribed medication.
- To comply fully with the Equality Act 2010 for students who may have disabilities or special educational needs.
- To write, in association with healthcare professionals, Individual Healthcare Plans where necessary.
- To continue to support students with medical conditions, so that they have full access to education, including physical education and educational visits.
- To respond sensitively, discreetly and quickly to situations where a child with a medical condition requires support.
- To keep, monitor and review appropriate records.

Definitions of Medical Conditions

Pupils' medical needs may be broadly summarised as being of two types:-

- **Short-term** affecting their participation at school because they are on a course of medication.
- **Long-term** potentially limiting access to education and requiring on-going support, medicines or care while at school to help them to manage their condition and keep them well, including monitoring and intervention in emergency circumstances. It is important that parents feel confident that the school will provide effective support for their child's medical condition and that student's feel safe.

Some students with medical conditions may be considered disabled. Where this is the case governing bodies must comply with their duties under the Equality Act 2010. Some may also have Special Educational Needs (SEN) and may have a statement or Education, Health and Care Plan (EHCP). Where this is the case this policy should be read in conjunction with the 0-25 SEND Code of Practice and the Academy's Learning Support Policy and SEN Information Report and the individual healthcare plan (if necessary) will become part of the EHCP.

The Statutory Duty of the Governing Body

The governing body remains legally responsible and accountable for fulfilling their statutory duty for supporting students at the Academy with medical conditions. The governing body of Haywood Academy fulfil this by:-

- Ensuring that arrangements are in place to support students with medical conditions. In doing so we will ensure that such students can access and enjoy the same opportunities at the Academy as any other student;
- Taking into account the many medical conditions that require support at school will affect quality of life and may be life-threatening. Some will be more obvious than others and therefore the focus is on the needs of each individual student and how their medical condition impact on their school life;
- Ensuring that the arrangements give parents and students confidence in the Academy's ability to provide effective support for medical conditions, should show an understanding of how medical conditions impact on a student's ability to learn, as well as increase their confidence and promote self-care. We will ensure that staff are properly trained to provide the support that students need;
- Ensuring that no student with a medical condition is denied admission, or prevented from taking up a place in school because arrangements for their medical condition have not been made. However, in line with safeguarding duties, we will ensure that students' health is not put at unnecessary risk from, for example, infectious diseases, and reserve the right to refuse admittance to a child at times where it would be detrimental to the health of that student or others to do so;

- Ensuring that the arrangements put in place are sufficient to meet our statutory duties and ensure that policies, plans, procedures and systems are properly and effectively implemented;
- Developing a policy for supporting pupils with medical conditions that is reviewed regularly and accessible to parents and school staff (this policy);
- Ensuring that the policy includes details on how the policy will be implemented effectively, including a named person who has overall responsibility for policy implementation (see section below on policy implementation);
- Ensuring that the policy sets out the procedures to be followed whenever the Academy is notified that a student has a medical condition (see section below on procedure to be followed when notification are received that a student has a medical condition);
- Ensuring that the policy covers the role of individual healthcare plans, and who is responsible for their development, in supporting pupils at the Academy with medical conditions (see section below on individual healthcare plans);
- Ensuring that the Academy policy clearly identifies the roles and responsibilities of all those involved in arrangements for supporting students at the Academy with medical conditions and how they will be supported, how their training needs will be assessed and how and by whom training will be commissioned and provided (see section below on staff training and support);
- Ensuring that the Academy policy covers arrangements for students who are competent to manage their own health needs and medicines (see section below on the student's role in managing their own medical needs);
- Ensuring that the policy is clear about the procedures to be followed for managing medicines including the completion of written records (see section below on managing medicines on school premises);
- Ensuring that the policy sets out what should happen in an emergency situation (see section below on emergency procedures);
- Ensuring that the arrangements are clear and unambiguous about the need to support actively students with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them from doing so (see section on day trips, residential trips and sporting activities);
- Ensuring that the policy sets out how complaints may be made and will be handled concerning the support to pupils with medical conditions (see section on complaints).

Policy Implementation

The statutory duty for making arrangements for supporting students at the Academy with medical conditions rests with the Governing Body.

The overall responsibility for the implementation of this policy is given to the Designated Safeguarding Lead (DSL) who is Sian Hughes and the Learning Support Manager (LSM) who is Nathan Legg. They will also be responsible for ensuring that sufficient staff are suitably trained and will ensure cover arrangements in cases of staff absences or staff turnover to ensure that someone is always available and on-site with an appropriate level of training.

The Learning Support Manager (LSM) will be responsible in conjunction with parents/carers, for drawing up, implementing and keeping under review the individual healthcare plan for each pupil and making sure relevant staff are aware of these plans. The Designated Safeguarding Lead(s) (DSL), has overall responsibility for Safeguarding students, including those with medical conditions. The LSM and DSL will work collaboratively to ensure the policy aims are secured.

All members of staff are expected to show a commitment and awareness of student's medical conditions and the expectations of this policy. All new members of staff will be inducted into the arrangements and guidelines in this policy upon taking up their post.

Procedures

This covers notification prior to admission, procedures to cover transitional arrangements between schools or alternative providers, and the process to be followed upon reintegration after a period of absence or when students' needs change. For students being admitted to Haywood Academy for the first time with good notification given, the arrangements will be in place for the start of the relevant school term. In other cases, such as a new diagnosis or a child moving to the Academy mid-term, we will make every effort to ensure that arrangements are put in place within two weeks.

In making the arrangements, we will take into account that many of the medical conditions that require support at the Academy will affect quality of life and may be life-threatening. We also acknowledge that some may be more obvious than others. We will therefore ensure that the focus is on the needs of each individual child and how their medical condition impacts on their school life. We aim to ensure that parents/carers and students can have confidence in our ability to provide effective support for medical conditions, so the arrangements will show an understanding of how medical conditions impact on the student's ability to learn, as well as increase their confidence and promote self-care.

We will ensure that staff are properly trained and supervised to support students' medical conditions and will be clear and unambiguous about the need to support actively students with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them in doing so. We will make arrangements for the inclusion of students in such activities with any adjustments as required unless evidence from a clinician such as a GP states that this is not possible. We will make sure that no student with a medical condition is denied admission or prevented from attending the Academy because arrangements for supporting their medical condition have not been made. However, in line with our safeguarding duties, we will ensure that all students' health is not put at unnecessary risk from, for example infectious disease. We will therefore not accept a student in school at times where it would be detrimental to the health of that student or others.

Haywood Academy does not necessarily have to wait for a formal diagnosis before providing support to students. In cases where a student's medical condition is unclear, or where there is a difference of opinion, judgements will be needed about what support to provide based on available evidence. This would normally involve some form of medical evidence and consultation with parents/carers. Where evidence conflicts, some degree of challenge may be necessary to ensure that the right support can be put in place. These discussions will be led by the LSM, and following these discussion an individual healthcare plan may be written in conjunction with the parent/carers by the LSM, and be put in place.

Individual Healthcare Plans

Individual healthcare plans will help to ensure that Haywood Academy effectively supports pupils with medical conditions. They will provide clarity about what needs to be done, when and by whom. They will often be essential, such as in cases where conditions fluctuate or where there is a high risk that emergency intervention will be needed. They are likely to be helpful in the majority of other cases too, especially where medical conditions are long-term and complex. However, not all students will require one. The Academy, healthcare professional and parent/carer should agree, based on evidence, when a healthcare plan would be inappropriate or disproportionate. If consensus cannot be reached the LSM in conjunction with the Head of School, is best placed to take a final view.

Individual healthcare plans will be easily accessible to all who need to refer to them, while preserving confidentiality. Plans will capture the key information and actions that are required to support the child effectively. The level of detail within the plan will depend on the complexity of the student's condition and the degree of support needed. This is important because different students with the same health condition may require very different support. Where a child has a Special Educational Need but does not have an EHC plan, their Special Educational Needs should be mentioned in their individual healthcare plan.

Individual healthcare plans (and their review) should be drawn up in partnership between the school, parents/carers and a relevant healthcare professional eg school, specialist or children's community nurse, who can best advise on the particular needs of the child. Students should also be involved whenever appropriate. The aim should be to capture the steps which the Academy should take to help manage their condition and overcome any potential barriers to getting the most from their education. Partners should agree who will take the lead in writing the plan, but responsibility for ensuring it is finalised and implemented rests with the Academy.

The Academy will ensure that individual healthcare plans are reviewed at least annually or earlier if evidence is presented that the student's needs have changed. They will be developed and reviewed with the student's best interests in mind and ensure that the Academy assesses and manages risks to the student's education, health and social wellbeing, and minimises disruption. Where a student is returning to school following a period of hospital education or alternative provision, we will work with the local authority and education provider to ensure that the individual healthcare plan identifies the support the child will need to reintegrate effectively.

They should all include the following information:

- The medical condition, its triggers, signs, symptoms and treatments;
- The student's resulting needs, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is

used to manage their condition, dietary requirements and environmental issues eg crowded corridors, travel time between lessons;

- Specific support for the student's educational, social and emotional needs - for example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions;
- The level of support needed (some student's will be able to take responsibility for their own health needs) including in emergencies. If a student is self-managing their medication, this should be clearly stated with appropriate arrangements for monitoring;
- Who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the student's medical condition from a healthcare professional; and cover arrangements for when they are unavailable;
- Who in the Academy needs to be aware of the student's condition and the support required;
- Arrangements for written permission from parents/carer and the DSL/LSM, for medication to be administered by a member of staff, or self-administered by the pupil during school hours;
- Separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the student can participate eg, risk assessment;
- Where confidentiality issues are raised by the parent/student, the designated individual to be entrusted with information about the student's condition; and
- What to do in an emergency, including whom to contact, and contingency arrangements. Some students may have an emergency healthcare plan prepared by their lead clinician that could be used to inform development of their individual healthcare pla

Roles and Responsibilities

Please refer to the section on policy implementation for the functions that have been delegated to different, named members of staff at Haywood Academy.

In addition we can refer to the Our Health 0 - 19 for support with drawing up Individual Healthcare Plans, provide or commission specialist medical training, liaison with lead clinicians and advice or support in relation to pupils with medical conditions.

Other **healthcare professionals**, including GPs and paediatricians should notify the Our Health Team when a student has been identified as having a medical condition that will require support at the Academy. Specialist local health teams may be able to provide support, and training to staff, for children with particular conditions (eg asthma, diabetes, epilepsy).

Students with medical conditions will often be best placed to provide information about how their condition affects them. They should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of, and comply with, their individual healthcare plan. Other pupils will often be sensitive to the needs of those with medical conditions,

and can, for example, alert staff to the deteriorating condition or emergency need of students with medical conditions.

Parents/Carers should provide the Academy with sufficient and up-to-date information about their child's medical needs. They may in some cases be the first to notify the school that their child has a medical condition. Parents/Carers are key partners and should be involved in the development and review of their child's individual healthcare plan, and may be involved in its drafting. They should carry out any action they have agreed to as part of its implementation, eg provide medicines and equipment and ensure they or another nominated adult are contactable at all times.

Local authorities have a duty to support students where they would not receive a suitable education in a mainstream school because of their health needs. The local authority has a duty to make other arrangements. Statutory guidance for local authorities sets out that they should be ready to make arrangements under this duty when it is clear that a child will be away from school for 15 days or more because of health needs (whether consecutive or cumulative across the year) education for children with health needs who cannot attend school.

Providers of **health services** should co-operate with the Academy that are supporting children with medical conditions. They can provide valuable support, information, advice and guidance to schools, and their staff, to support children with medical conditions at the Academy.

The **Ofsted** inspection framework places a clear emphasis on meeting the needs of disabled children and pupils with SEN, and considering the quality of teaching and the progress made by these pupils. Inspectors are already briefed to consider the needs of pupils with chronic or long-term medical conditions alongside these groups and to report on how well their needs are being met.

Staff training and Support

<u>Training</u>	<u>Number of Staff</u>
First Aid at Work (3 Day)	19

Template A will be used to record staff training for administration of medicines and /or medical procedures.

All staff who are required to provide support to pupils for medical conditions will be trained by healthcare professional qualified to do so. The training need will be identified by the healthcare professional during the development or review of the individual healthcare plan (if necessary). With the exception of general training which will be updated regularly or when statutory guidelines change. We may choose to arrange training ourselves and will ensure that it remains up-to-date. General training is available to all staff via Safeguarding training.

Training should be sufficient to ensure that staff are competent and have confidence in their ability to support students with medical conditions, and to fulfil the requirements set out in the individual healthcare plans. They will need an understanding of the specific medical conditions they are being asked to deal with, their implications and preventative measures.

All staff will receive induction training and regular whole school awareness training so that all staff are aware of the Academy's policy for supporting pupils with medical conditions and their role in implementing the policy. The DSL, LSM and the Head of School, will seek advice from relevant healthcare professions about training needs, including preventative and emergency measures so that staff can recognise and act quickly when a problem occurs.

The family of a child will often be key in providing relevant information to school staff about how their child's needs can be met, and parents will be asked for their views. They should provide specific advice, but should not be the sole trainer.

The Student's role in managing their own medical needs

If, after discussion with the parent/carer, it is agreed that the student is competent to manage his/her own medication and procedures, s/he will be encouraged to do so. This will be reflected in the individual healthcare plan if necessary.

Wherever possible students will be allowed to carry their own medicines and relevant devices or should be able to access their medication for self-medication quickly and easily; these will be stored in the cupboard in name which room to ensure that the safeguarding of other students is not compromised. The Academy does also recognise that children who take their medicines themselves and/or manage procedures may require an appropriate level of supervision. If it is not appropriate for a student to self-manage, then relevant staff will help to administer medicines and manage procedures for them.

If a student refuses to take medicine or carry out a necessary procedure, staff should not force them to do so, but follow the procedure. Parents will be informed so that alternative options can be considered.

Managing medicines on Academy premises and record keeping

At Haywood Academy the following procedures are to be followed:

- Medicines should only be administered at school when it would be detrimental to a student's health or school attendance not to do so;
- No student under the age of sixteen should be given prescription or non-prescription medicines without their parent or carers written consent (see template B) - except in exceptional circumstances where the medicine has been prescribed to the student without the knowledge of the parents. In such cases, every effort should be made to encourage the student to involve their parents while respecting their right to confidentiality. Students at the Sixth Form Academy do not need parental consent, unless the parent or carer acts as an advocate or health care professionals deem it to be inappropriate for them to decide on their medical treatment alone;
- With parental written consent we will administer non-prescription medicines (paracetamol, anti-histamines and travel sickness only) except never aspirin or containing aspirin except prescribed by a doctor. Medication, eg for pain relief, should never be administered without first checking maximum dosage and when previous dose was taken. Parents should be informed. Non-prescription medicines must be supplied, by the parent or carer, in its original packaging with the manufactures instructions intact;
- Where clinically possible, medicines should be prescribed in dose frequencies which enable them to be taken outside school hours;
- The Academy will only accept prescribed medicines, with written permission from parent/carer that are in-date, labelled, provided in the original container as dispense a pharmacist and include instructions for administration, dosage and storage. The exception

to this is insulin which must be in-date, but will generally be available to schools inside an insulin pen or a pump, rather than its original container;

- All medicines will be stored safely in either the Learning Support Office or the student reception. All students should know where their medicines are at all times and be able to access them immediately. Where relevant, they should know who holds the key to the storage facility. Students will have a pass inside their student planner with this detail, should there be an emergency;
- Medicines and devices such as asthma inhalers, blood glucose testing meters, epi-pens and adrenaline pens should always be in a readily available state and not locked away. Asthma inhalers should be marked with the student's name.
- During school trips the first aid trained member of staff will carry all medical devices and medicines required – unless the student carries this themselves on a usual school day, unless it is unsafe to do so (e.g. physical activities);
- A student who has been prescribed a controlled drug may legally have it in their possession if they are competent to do so, but passing it to another student for use is an offence. Monitoring arrangements may be necessary. Otherwise we will keep all controlled drugs that have been prescribed for a student securely stored in a non-portable container and only named staff will have access. Controlled drugs should be easily accessible in an emergency. A record should be kept of any doses used and the amount of the controlled drug held in the Academy building;
- Staff administering medicines should do so in accordance with the prescriber's instructions. Haywood Academy will keep a record (see template C and D) of all medicines administered to individual students, stating what, how and how much was administered, when and by whom. Any side effects of the medication to be administered at school should be noted. Written records are kept of all medicines administered to students. These records offer protection to staff and students and provide evidence that agreed procedures have been followed;
- When no longer required, medicines should be returned to the parent/carer to arrange safe disposal. Sharps boxes should always be used for the disposal of needles and other sharps.

Emergency Procedures

The Head of School will ensure that arrangements are in place for dealing with emergencies for all school activities wherever they take place, including school trips within and outside the UK, as part of the general risk management process.

Where a student has an individual healthcare plan, this should clearly define what constitutes an emergency and explain what to do, including ensuring that all relevant staff are aware of emergency symptoms and procedures. Other students in the school should know what to do in general terms, such as informing a member of staff immediately if they think help is needed.

If a student needs to be taken to hospital, staff should stay with the child until the parent or carer arrives, or accompany a student taken to hospital by ambulance.

Epi-pen's

Any member of staff can administer an epi-pen in an emergency. The pen (cap off) should be pushed against the student's thigh, through clothing if necessary. The pen should be held for a count of 10 seconds before being withdrawn. Ambulances must be called for a child who may require an epi-pen. Parents should be contacted after this call has been made.

Day trips, Residential visits, and Sporting Activities

We will actively support students with medical condition to participate in day trips, residential visits and sporting activities by being flexible and making reasonable adjustments unless there is evidence from a clinician such as a GP that this is not possible.

We will always conduct a risk assessment so that planning arrangements take account of any steps needed to ensure that students with medical conditions can be included safely. This will involve consultation with parents/carers and relevant healthcare professions and will be informed by Health and Safety Executive (HSE) guidance on school trips.

Other Issues for Consideration

Where a pupil uses home-to-school transport arranged by the LA and they also have a medical condition which is life-threatening, we will share the student's individual healthcare plan (if necessary) with the local authority.

The Academy has defibrillators in the following locations:

<u>Location</u>	<u>Building</u>
Main Reception	Haywood Academy
Student Reception	Haywood Academy - Library

The Academy allows students to have access to emergency inhaler use. They are stored in both the student and main receptions.

The Academy has first aid boxes in the following locations:

<u>Location</u>	<u>Building</u>
Reception Desk	Haywood Sixth Form Academy – Town Hall
Yale	Haywood Sixth Form Academy – Town Hall
Harvard	Haywood Sixth Form Academy – Town Hall
Cambridge	Haywood Sixth Form Academy – Town Hall
Oxford	Haywood Sixth Form Academy – Town Hall
Main Reception	Haywood Sixth Form Academy – Burslem School of Art
Watson and Crick	Haywood Sixth Form Academy – Burslem School of Art
Café Area	Haywood Sixth Form Academy – Burslem School of Art

Please see the map for locations of first aid boxes at the Haywood Academy main site.

Unacceptable Practice

Although staff at the Academy should use their discretion and judge each case on its merit with reference to a student's medical needs it is not generally acceptable practice to:

- Prevent students from easily accessing their inhalers and medication and administering their medication when and where necessary;
- Assume that every student with the same condition requires the same treatment;
- Ignore the views of the student or their parents/carers; or ignore medical evidence or opinion (although this may be challenged);
- Send students with medical conditions home frequently or prevent them from staying for normal school activities, including lunch, unless this is specified in their individual healthcare plans or advice from a clinician;
- If the student becomes ill, send them to the student reception office unaccompanied or with someone suitable;
- Penalise student for their attendance record if their absences are related to their medical condition, eg hospital appointments (medical evidence should always be provided to the Academy by the parent/carer);
- Prevent students from drinking, eating or taking toilet breaks whenever they need to in order to manage their medical condition effectively, students will have a pass when an arrangement of this type is necessary;
- Require parents/carers, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their child, including with toileting issues; or
- Prevent a student from participating, or creating unnecessary barriers to children participating in any aspect of school life, including school trips, eg by requiring parents to accompany their child.

Complaints

Should parents/carers be unhappy with any aspect of their child's care at Haywood Academy, they must discuss their concerns with the school. This will be with their child's form tutor or performance leader in the first instance, with whom any issues should be addressed. If this does not resolve the problem or allay the concern, the problem should be brought to a member of Senior Leadership Team, who will, where necessary, bring concerns to the attention of the Head of School. In the unlikely event of this not resolving the issue, the parent/carer must make a formal complaint using the Academy's Complaints Procedure.

Policy Review

This policy will be reviewed every 2 years as a minimum. It is next due for review in April 2019

Additionally, this policy will be reviewed and updated if legislative updates occur.

This policy will always be immediately updated to reflect personnel changes.
